Ellie Brace

"Before University, I studied Psychology, Sociology and English Literature at Dudley Sixth Form and achieved AAB at A-Level.

When I moved to university level to study Criminology, I was very shy and anxious at first and I did not really get involved in a lot other than my degree lectures, but after a year and a half of doing this, I decided to throw myself into the deep end and see what University life was about. I attended a Union event held by the Students' Union and never really looked back! I became a Course Rep and Faculty Rep (using my experience of working with peers at my college and becoming someone who gathered their valuable feedback) and Chair of Student Forum.

I also became a Student Ambassador, helping out at Open Days and subject taster sessions to give a true reflection of student experience.

This all gave me the confidence and motivation to complete my degree and receive a first class one, but also to run in the Students' Union election (and win!) as Vice President! Now, after completing my year in post, I have moved on to work in a secondary school as a Teaching Assistant for SEND and Inclusion, and I am so thankful for my university experience as this helped shape the resilient, confident and determined person I am today!"

Ayallah Richards-Mitchell

"I have thoroughly enjoyed my counselling
